About Shapeways

Shapeways is the world's largest online 3D printing service, delivering prints straight to your door, all printed on the most cutting-edge technology. The service is expanding to become an end-to-end platform for independent creators looking to design, make, and sell their creations.

Offering 60+ materials and finishes, Shapeways has factories and offices in New York, the Netherlands, and partners around the globe.

Shapeways' investors include Union Square Ventures, Index Ventures, Lux Capital, Andreessen Horowitz, INKEF Capital, Hewlett Packard Ventures, and Presidio Ventures.

How It Works for Designers

1. Upload your 3D design to Shapeways.com.
2. Select the material in which you'd like to 3D print – Shapeways offers 60+ materials and finishes, including ceramic, plastics, and metals such as 14 carat gold, sterling silver, steel and bronze.
3. The designs are reviewed by our 3D print engineering team to ensure that they are viable for 3D printing. Once confirmed, the design is sent to a 3D printer.
4. 3D printers build products one layer at a time, slowly building up to the final product.
5. This process can take anywhere from hours to days depending on the size and complexity of the design. The industrial machines we use can build thousands of parts at the same time, enabling scale.
6. Once complete, products are removed from the printer and cleaned.
7. Printed products may be polished or dyed depending on the material and order.
8. The finished product is packaged by Shapeways and shipped directly to the creator or shopper!

How It Works for Shoppers

1. Find a product you love.
2. Select your favorite material for the product.
3. Complete your purchase. You'll be supporting an individual designer.
4. Shapeways 3D prints the product just for you.
5. Receive and enjoy your new 3D printed product!
